TASK - 11

Use tkinter module for UI design

AIM: To design a simple GUI application using the Tkinter module in Python to collect and display student details such as name, Roll number, Department and Email.

ALGORITHM

1. Start the program.
2. Import the tkinter module and message box
3. For all components
3. Create the main window using Tk() and let the window title, size, and background colour
4. Add labels and entry widgets for:
 - Name
 - RollNumber
 - Department
 - Email
5. Create two buttons:
 - Submit: fetch and display entered details
 - In a message box
 - Clear: Reset all input fields to empty.
- 6) Define functions:
 - Submit - details(): collects and displays student data
 - Clear - fields(): clears all entry fields
7. Place all widgets using grid or pack layout
8. Run the tkinter main loop using root.mainloop()
9. End the program.

Student Information

Name

Rahul Sharma

Roll number

103

Department

Computer Science

Email

Rahul.Sharma@gmail.com

Submit

Clear

program:

from tkinter import
from tkinter import message box

def submit_details():

name = name_entry.get()
roll = roll_entry.get()
dept = dept_entry.get()
email = email_entry.get()

If name == "" or roll == "" or dept == "" or email == ""
message box. show warning ("Input Error" # All field
are required, ").

else:
info = f"Student Details : \n\n Name: {name} \n.
Roll number: {roll} \n Department: {dept} \n Email:
message box: show info ("Submitted Details", info).

def clear_fields():

name_entry.delete(0, END).
roll_entry.delete(0, END).
dept_entry.delete(0, END).
email_entry.delete(0, END).

#main window

root = Tk()

root.title("Student Information form")

root.geometry("400x300")

root.configure(bg="#d1d1d1")

```
label(root, text="Student Information form")
font = ("Arial", 16, "bold") bg = "#d1f0f1")
pack(pady=1)
```

```
frame = frame(root, bg="#d1f0f1")
frame.pack(pady=10)
label(frame, text="Name:", font=("Arial", 12),
bg="#d1f0f1") grid(row=0, column=0,
stick=W, pady=1)
```

```
volume - entry = Entry(frame, width=30)
volume - entry.grid(row=0, column=1)
```

```
label(frame, text="Roll Number", font=("Arial", 12),
bg="#d1f0f1") grid(row=1, column=0, stick=W)
```

```
roll - entry = Entry(frame, width=30)
```

```
roll - entry.grid(row=1, column=1)
```

```
label(frame, text="Department:", font=("Arial", 12),
bg="#d1f0f1") grid(row=2, column=0, stick=W)
```

```
dept - entry = Entry(frame, width=30)
```

```
dept - entry.grid(row=2, column=1)
```

```
label(frame, text="Email:", font=("Arial", 12),
bg="#d1f0f1") grid(row=3, column=0,
stick=W)
```

```
Email - entry = Entry(frame, width=30)
```

```
Email - entry.grid(row=3, column=1)
```

```
button(root, text="Submit", width=13, bg="#4682b4",
fg="white", command=submit - details).pack
```

Button (root) text = "clear", width=19, height=19,
fg="white", command=clear_fields.pack
(padx=5)

root.mainloop()
